Description: DCMI Usage Board decisions
Creator: [DCMI Usage Board](#)
Identifier: <http://dublincore.org/usage/decisions/>
Date modified: 2002-09-16
Description: This document is a periodically updated index, in reverse chronological order, of decisions taken by the Usage Board (since May 2001); its predecessor, the Usage Committee (1999-2000); and the DCMI Advisory Committee (1998-1999). See <http://dublincore.org/usage/meetings/> for historical details. Decisions documented here can be cited by their full Identifier. This document is maintained by the Chair of Usage Board, currently Tom Baker.

Title: Decision-2002-03
Identifier: <http://dublincore.org/usage/decisions/#Decision-2002-03>
Description: Recommendations Concerning Capitalization in DCMI Namespace and Term Declarations by the DCMI Directorate
Date: 2002-09-13

Title: DCMI Usage Board documentation
Creator: [DCMI Usage Board](#)
Identifier: <http://dublincore.org/usage/documents/>
Date modified: 2002-09-16
Description: This page, periodically updated, provides annotated links to process and policy documentation produced by or relevant to the DCMI Usage Board. Documentation of DCMI metadata terms -- the DCMI Type Vocabulary, the Dublin Core Metadata Element Set version 1.1, plus all elements and qualifiers approved since DCMES 1.1 -- is in the process of being significantly overhauled and will be available at <http://dublincore.org/usage/terms/>.

== Mission and Principles

<http://dublincore.org/usage/documents/mission/>

This document describes the scope and mission of the DCMI Usage Board, summarizing the principles of "grammar" according to which it maintains the metadata vocabularies of the Dublin Core Metadata Initiative. This description complements that of the DCMI Namespace Policy (see below), which also defines terms of reference.

Version history:

2001-06-28: <http://dublincore.org/usage/documents/2001/06/28/mission/>

2001-06-12: <http://dublincore.org/usage/meetings/2001/05/mission.html>

== Procedure for Approval of DCMI Metadata Terms and Recommendations

<http://dublincore.org/usage/documents/approval/>

This document complements the Usage Board Administrative Process (above) by providing a table and diagram summarizing the administrative steps for moving proposals.

Version history:

2001-06-27: <http://dublincore.org/usage/documents/2001/06/27/approval/>

== DCMI Usage Board Review of Application Profiles

<http://dublincore.org/usage/documents/profiles/>

This document defines the term "Application Profile" in the context of the Dublin Core Metadata Initiative and outlines the criteria by which the DCMI Usage Board can review an Application Profile and assign to it a status.

Version history:

<http://dublincore.org/usage/documents/2002/07/06/profiles/>

== Namespace Policy for the Dublin Core Metadata Initiative (DCMI)
<http://dublincore.org/documents/dcmi-namespace/>

An XML namespace is a collection of names, identified by a URI reference, that are used in XML documents as element types and attribute names. The use of XML namespaces to uniquely identify metadata terms allows those terms to be unambiguously used across applications, promoting the possibility of shared semantics. DCMI adopts this mechanism for the identification of all DCMI terms. This document specifies the conventions used for identifying current and future DCMI namespaces. All DCMI recommendations that make use of namespaces will conform to this recommendation.

Version history:

2001-10-26: <http://dublincore.org/documents/2001/10/26/dcmi-namespace/>

2001-09-17: <http://dublincore.org/documents/2001/09/17/dcmi-namespace/>

2001-03-09: <http://dublincore.org/documents/2001/03/09/dcmi-namespace/>

== DCMI Publication Policy
<http://dublincore.org/usage/documents/publications/>

This document provides an overview of the types of publications produced by the Dublin Core Metadata Initiative, with a summary of persistence policies and copyright.

Version history:

2001-07-03: <http://dublincore.org/usage/documents/2001/07/03/publications/>

== DCMI Usage Board mailing-list discussion
<http://www.jiscmail.ac.uk/lists/dc-usage.html>

Membership in the mailing list is limited to members of the Usage Board, however all postings to this list are publicly accessible, with a lag of several hours, at the JISCMail Web site.

Title: DCMI Usage Board Mission and Policies
Creator: [DCMI Usage Board](#)
Identifier: <http://dublincore.org/usage/documents/2002/07/13/mission/>
Latest version: <http://dublincore.org/usage/documents/mission/>
Date modified: 2002-07-13

1. Mission of the DCMI Usage Board

The mission of the Usage Board is to ensure an orderly evolution of the metadata terms maintained by the Dublin Core Metadata Initiative. The Usage Board evaluates proposals for new terms (or changes to existing terms) in light of grammatical principle, semantic clarity, usefulness, and overlap with existing terms. To proposals that are accepted it assigns a specific status. The Usage Board also evaluates constructs that use DCMI terms, such as Application Profiles. The Usage Committee strives for consensus, justifying its decisions and interpretations in terms both of principle and of empirical practice.

2. Publication policy

The Usage Board makes available its proceedings and decisions in a publicly available space on the DCMI Web site.

3. Process

Usage Board process is described in a separate document, "DCMI Usage Board Administrative Processes" [1].

4. Scope

The Usage Board maintains the terms defined within DCMI namespaces, as described in the document "Namespace Policy for the Dublin Core Metadata Initiative" [2], and reviews constructs that use these terms, such as Application Profiles [3]. The typology of terms is described in the document "DCMI Grammatical Principles" [4].

Title: DCMI Grammatical Principles
Creator: [DCMI Usage Board](#)
Identifier: <http://dublincore.org/usage/documents/principles/>
Date modified: 2002-10-06
Description: As of October 2002, this statement of grammatical principles was under revision. Users interested in the latest draft should contact the Usage Board.

1. DCMI metadata grammar

Dublin Core may be seen as a small language for making a particular class of statements about resources. Like natural languages, it has a vocabulary of word-like terms, the two classes of which -- elements and qualifiers -- function within statements like nouns and adjectives; and it has a syntax for arranging elements and qualifiers into statements according to a simple pattern. Optional qualifiers may make the meaning of a property more definite, as in "Resource has dc:date dcq:revised '2000-06-13'."

Vocabulary terms in Dublin Core refer to elements, qualifiers, or terms in controlled vocabularies maintained by DCMI. Vocabulary terms are uniquely defined in namespaces [2].

Strictly speaking, a Dublin Core element or qualifier is a unique identifier formed by a name (e.g., title) prefixed by the URI of the namespace in which it is defined, as in <http://purl.org/dc/elements/1.1/title>. In this context, a namespace is a vocabulary that has been formally published, usually on the Web; it describes elements and qualifiers with natural-language labels, definitions, and other relevant documentation.

2.1. Elements

An element is a property of a resource.

2.2. Qualifiers

Qualifiers modify the properties of Dublin Core statements by specifying, in the manner of natural-language adjectives, "what kind" of subject, date, or relation. Qualifiers currently fall into two classes:

2.2.1. Element Refinements. An element refinement is a qualifier that makes the meaning of an element narrower or more specific. A refined element shares the meaning of the unqualified element, but with a more restricted scope. A client that does not understand a specific element refinement term should be able to ignore the qualifier and treat the metadata value as if it were an unqualified (broader) element. The definitions of element refinement terms for qualifiers must be publicly available.

2.2.2. Encoding Schemes. Encoding schemes are pointers to contextual information or parsing rules that aid in the interpretation of an element value. These schemes include controlled vocabularies and formal notations or parsing rules. A value expressed using an encoding scheme will thus be a token selected from a controlled vocabulary (e.g., a term from a classification system or set of subject headings) or a string formatted in accordance with a formal notation (e.g., "2000-01-01" as the standard expression of a date). If an encoding scheme is not understood by a client or agent, the value may still be useful to a human reader. The definitive description of an encoding scheme for qualifiers must be clearly identified and available for public use.

2.3. Dumb-down Principle

The qualification of Dublin Core properties is guided by a rule known colloquially as the Dumb-Down Principle. According to this rule, a client should be able to ignore any qualifier and use the value as if it were unqualified. While this may result in some loss of specificity, the remaining element value (minus the qualifier) must continue to be generally correct and useful for discovery. Qualification is therefore supposed only to refine, not extend the semantic scope of a property.

2.4. Appropriate values

Best practice for a particular element or qualifier may vary by context. Definitions may provide some guidance; other information may be found in the User's Guide [4].

2.5. Controlled-Vocabulary terms

The Usage Board maintains the DCMI Type Vocabulary -- a general, cross-domain list of recommended terms that may be used as values for the Resource Type element to identify the genre of a resource. The member terms of the DCMI Type Vocabulary are called Controlled-Vocabulary Terms.

Title: DCMI Usage Board Review of Application Profiles
Creator: Thomas Baker
Identifier: <http://dublincore.org/usage/documents/2002/07/06/profiles/>
Latest version: <http://dublincore.org/usage/documents/profiles/>
Date modified: 2002-07-06
Description: This document defines the term "Application Profile" in the context of the Dublin Core Metadata Initiative and outlines the criteria by which the DCMI Usage Board can review an Application Profile and assign to it a status.

1. "Application Profile" defined

For the purposes of DCMI Usage Board review, an Application Profile (AP) is a declaration of which metadata terms an organization, information resource, application, or user community uses in its metadata. Moreover:

- By definition, an AP cannot "declare" new metadata terms and definitions; it only "reuses" terms from existing element sets [HEERY].
- The ideal element set will use URIs to uniquely identify its terms within XML namespaces [DCMI-NAMESPACE]. As of 2002, however, this cannot be required.
- By definition, any new term coined for use in an AP must first be declared in a form citable in the AP.
- An AP may also provide additional documentation on how the terms used are constrained, encoded, or interpreted for particular purposes.

As of 2002, APs are seen primarily as a form of documentation, the purpose of which is to help implementor communities harmonize their metadata practice. It is hoped that in the longer term, machine-processable versions of such APs based on data models such as RDF will provide a basis for automating metadata interoperability functions such as semantic crosswalks and format conversions.

2. Documentation requirements for Application Profiles

Application Profiles may be presented to the Usage Board by any DCMI working group.

For the purposes of review by the Usage Board:

- APs must provide, for each term, an identifier of the element set where it is defined, ideally in the form of URIs for individual terms.
- If the terms in an AP describe anything other than generic "resources" (the typical domain of Dublin Core), the AP must make this clear. This is particularly important if an AP is based on a data model that describes multiple classes of resources, such as agents or collections.
- It is recommended that APs be prepared using previously reviewed APs as models for their layout,

appearance, and content. Aside from the required term and element set identifiers, there are no particular constraints on the types of documentation -- local definitions, comments, constraints, or technical notes -- that may be associated with a term.

- Each AP must provide, or point to, a short text that describes:
 - The context and purposes in which the AP is used or is likely to be used.
 - The organizations or individuals involved in its development and a capsule history thereof.
 - Any arrangements, policies, or intentions regarding the future development and maintenance of the AP.

3. Review of Application Profiles by the Usage Board

- The Usage Board is interested in reviewing APs that make substantial use of Dublin Core elements. The review of APs by the Usage Board serves to:
 - analyze the usage of Dublin Core within significant implementations;
 - assign a DCMI stamp of approval;
 - promote the sharing of APs between communities; and
 - identify new terms as candidates for inclusion in DCMI namespaces.
- An AP is "well-formed" if it is presented in accordance with the broad and flexible requirements outlined above. These presentation requirements may become more specific as "good practice" emerges over time.
- Usage Board review focuses on the use of terms related to Dublin Core terms and on any data models that provide a context for those terms. The Usage Board is agnostic about the use of terms not directly related to Dublin Core; strictly speaking such terms are outside the scope of Usage Board review.
- The use of terms related to Dublin Core (such as qualifiers of Dublin Core elements, or Dublin Core elements that have been constrained for particular contexts) will be evaluated from the standpoint of grammatical principle (eg, "dumb-down"), clarity, and good practice.

4. Publication and use of Usage Board reviews

- For APs that "pass" review, the Usage Board will publish a Review on a Web page for APs.
- Each Review will include, at a minimum:
 - Any comments from the Usage Board on the AP.
 - Pointers to locally archived copies of the AP as originally submitted and (if necessary) as subsequently amended in light of Usage Board comments.

- A pointer to the "latest version" of an AP held by its maintainers.
- Review represents a form of recognition, and its URL will be persistent for purposes of citation.
- The official status of reviewed APs will be that of "Reviewed".

Title: DCMI Usage Board - overview
Creator: [DCMI Usage Board](#)
Identifier: <http://dublincore.org/usage/>
Date modified: 2002-10-06

Roadmap to Usage Board documentation

- Users interested in seeing the latest, complete documentation of all DCMI-maintained metadata terms should consult:

Elements and Element Refinements -- a current list
<http://dublincore.org/usage/terms/dc/current-elements/>

This list includes the fifteen Elements of the original Dublin Core of 1996-1999, plus Elements and Element Refinements approved since then. It does not include Encoding Schemes, listed separately.

As a listing of the fifteen Elements of the original Dublin Core, this document supersedes the document at <http://dublincore.org/documents/1999/07/02/dces/> as a source of authoritative and up-to-date information.

As a listing of Element Refinements -- one of the two types of qualifier -- this document supersedes the document "Dublin Core Qualifiers" at <http://dublincore.org/documents/2000/07/11/dcmes-qualifiers> as a source of authoritative and up-to-date information.

Encoding Schemes -- a current list
<http://dublincore.org/usage/terms/dc/current-schemes/>

As a listing of Encoding Schemes -- one of the two types of qualifier -- this document supersedes the document "Dublin Core Qualifiers" at <http://dublincore.org/documents/2000/07/11/dcmes-qualifiers> as a source of authoritative and up-to-date information.

DCMI Type Vocabulary
<http://dublincore.org/usage/terms/dcmitype/>

This document supersedes
<http://dublincore.org/documents/2000/07/11/dcmi-type-vocabulary/>
as the authoritative source of up-to-date information on the DCMI Type Vocabulary.

- Users interested in the full historical documentation of all versions of DCMI term declarations, past and present, with full chronological sequences of superseded wordings and statuses, will find this at <http://dublincore.org/usage/terms/dc/>. This information is strictly of historical interest and will not be of relevance to most implementors. It is disclosed in the interests of transparency and longevity.
- Users interested in current process and policy documents or in the documentation of meetings and decisions will find links below.

Title: DCMI Usage Board Meetings - a chronology
Creator: [DCMI Usage Board](#)
Identifier: <http://dublincore.org/usage/meetings/>
Latest version: <http://dublincore.org/usage/meetings/>
Date modified: 2002-06-18
Description: This document, periodically updated, provides annotated links to the agendas and meeting notes of DCMI Usage Board meetings. The decisions resulting from these meetings are documented at <http://dublincore.org/usage/decisions/>.

2002 May 12-13, Bath, UK

Agenda: <http://dublincore.org/usage/meetings/2002/05/agenda.html>
Meeting packet: <http://dublincore.org/usage/meetings/2002/05/meeting-packet.pdf>
seeAlso: <http://dublincore.org/usage/decisions/#Decision-2002-01>
seeAlso: <http://dublincore.org/usage/decisions/#Decision-2002-02>

The Usage Board met for two days in Bath (UK) to approve new-term proposals, discuss Usage Board documentation, and clarify issues related to process.

2001 October 22, Tokyo, Japan

Agenda: <http://dublincore.org/usage/meetings/2001/10/agenda.shtml>
Meeting notes: <http://dublincore.org/usage/meetings/2001/10/meeting-notes.shtml>
Meeting packet: <http://dublincore.org/usage/meetings/2001/10/2001-10-19.dc-usage.pdf>
seeAlso: <http://dublincore.org/usage/decisions/#Decision-2001-05>

The Usage Board met at DC2001 in Tokyo to discuss issues of process (ie, a Web-based fast-track procedure for registering encoding schemes) and review an extensive proposal from the DC-Government Working Group.

2001 May 21, Dublin, Ohio, USA

Agenda: <http://dublincore.org/usage/meetings/2001/05/index.shtml>
Meeting notes: <http://dublincore.org/usage/meetings/2001/05/meetingnotes.shtml>

At a DCMI meeting in Madeira, February 2001, the Advisory Committee approved the re-constitution of the old Usage Committee as a smaller Usage Board, the goal of which would be to meet twice per year face-to-face and review proposals for metadata term semantics in a timely, principled, and well-documented manner. The first meeting of the new Usage Board was held in May 2001 at OCLC in Dublin, Ohio. The Board discussed mission and process, an application profile, changed one definition, and approved three new metadata terms.

2000 January through July, DCMI mailing lists

A Usage Committee of twenty-four interested members of the DCMI Advisory Committee held a discussion over the Web and approved a set of first set of DCMI Qualifiers [3,6] and a controlled vocabulary of values for the Type element [5,7]. The discussion, from late 1999 through follow-up in July 2000, is archived on the (now-defunct) Mailbase service [1].

The voting results for individual qualifiers, with review comments, are archived at DCMI [2]. The set of qualifiers was issued as a DCMI Recommendation on 11 July [3], as described in a press release at that time [4].

Before the DCMI Usage Board (and its immediate precursor, the Usage Committee) were constituted as such, the Dublin Core Metadata Element Set versions 1.0 and 1.1 were approved by the Dublin Core Advisory Committee through discussion and balloting over the Web.

Title: DCMI Elements and Element Refinements - a current list
 Identifier: <http://dublincore.org/usage/terms/dc/current-elements/>
 Date generated: 2002-10-06
 Description: This document presents a snapshot of all current elements and element refinements maintained by the DCMI Usage Board. It was generated automatically at the date above from the definitive listing of all term definitions -- past and present -- maintained at <http://dublincore.org/usage/terms/dc/>. Users wishing to consult the full versioning information for a particular term declaration should follow the link labeled "This version:".

URI: <http://purl.org/dc/elements/1.1/title>
 Name: title
 Label: Title
 Definition: A name given to the resource.
 Comment: Typically, a Title will be a name by which the resource is formally known.
 Type of term: <http://dublincore.org/usage/documents/principles/#element>
 Status: <http://dublincore.org/usage/documents/process/#recommended>
 Date issued: 1998-08-06
 This version: <http://dublincore.org/usage/terms/dc/#title-004>

URI: <http://purl.org/dc/elements/1.1/creator>
 Name: creator
 Label: Creator
 Definition: An entity primarily responsible for making the content of the resource.
 Comment: Examples of a Creator include a person, an organisation, or a service. Typically, the name of a Creator should be used to indicate the entity.
 Type of term: <http://dublincore.org/usage/documents/principles/#element>
 Status: <http://dublincore.org/usage/documents/process/#recommended>
 Date issued: 1998-08-06
 This version: <http://dublincore.org/usage/terms/dc/#creator-004>

URI: <http://purl.org/dc/elements/1.1/subject>
 Name: subject
 Label: Subject and Keywords
 Definition: The topic of the content of the resource.
 Comment: Typically, a Subject will be expressed as keywords, key phrases or classification codes that describe a topic of the resource. Recommended best practice is to select a value from a controlled vocabulary or formal classification scheme.
 Type of term: <http://dublincore.org/usage/documents/principles/#element>
 Status: <http://dublincore.org/usage/documents/process/#recommended>
 Date issued: 1998-08-06
 This version: <http://dublincore.org/usage/terms/dc/#subject-004>

URI: <http://purl.org/dc/elements/1.1/description>
 Name: description
 Label: Description
 Definition: An account of the content of the resource.
 Comment: Description may include but is not limited to: an abstract, table of contents, reference to a graphical representation of content or a free-text account of the content.
 Type of term: <http://dublincore.org/usage/documents/principles/#element>
 Status: <http://dublincore.org/usage/documents/process/#recommended>
 Date issued: 1998-08-06

This version:	http://dublincore.org/usage/terms/dc/#description-004
URI:	http://purl.org/dc/elements/1.1/publisher
Name:	publisher
Label:	Publisher
Definition:	An entity responsible for making the resource available
Comment:	Examples of a Publisher include a person, an organisation, or a service. Typically, the name of a Publisher should be used to indicate the entity.
Type of term:	http://dublincore.org/usage/documents/principles/#element
Status:	http://dublincore.org/usage/documents/process/#recommended
Date issued:	1998-08-06
This version:	http://dublincore.org/usage/terms/dc/#publisher-004
URI:	http://purl.org/dc/elements/1.1/contributor
Name:	contributor
Label:	Contributor
Definition:	An entity responsible for making contributions to the content of the resource.
Comment:	Examples of a Contributor include a person, an organisation, or a service. Typically, the name of a Contributor should be used to indicate the entity.
Type of term:	http://dublincore.org/usage/documents/principles/#element
Status:	http://dublincore.org/usage/documents/process/#recommended
Date issued:	1998-08-06
This version:	http://dublincore.org/usage/terms/dc/#contributor-004
URI:	http://purl.org/dc/elements/1.1/date
Name:	date
Label:	Date
Definition:	A date associated with an event in the life cycle of the resource.
Comment:	Typically, Date will be associated with the creation or availability of the resource. Recommended best practice for encoding the date value is defined in a profile of ISO 8601 [W3CDTF] and follows the YYYY-MM-DD format.
References:	http://dublincore.org/usage/terms/references/#W3CDTF
Type of term:	http://dublincore.org/usage/documents/principles/#element
Status:	http://dublincore.org/usage/documents/process/#recommended
Date issued:	1998-08-06
This version:	http://dublincore.org/usage/terms/dc/#date-004
URI:	http://purl.org/dc/elements/1.1/type
Name:	type
Label:	Resource Type
Definition:	The nature or genre of the content of the resource.
Comment:	Type includes terms describing general categories, functions, genres, or aggregation levels for content. Recommended best practice is to select a value from a controlled vocabulary (for example, the DCMI Type Vocabulary [DCMITYPE]). To describe the physical or digital manifestation of the resource, use the Format element.
References:	http://dublincore.org/usage/terms/references/#DCMITYPE
Type of term:	http://dublincore.org/usage/documents/principles/#element
Status:	http://dublincore.org/usage/documents/process/#recommended
Date issued:	1998-08-06
This version:	http://dublincore.org/usage/terms/dc/#type-004
URI:	http://purl.org/dc/elements/1.1/format
Name:	format

Label:	Format
Definition:	The physical or digital manifestation of the resource.
Comment:	Typically, Format may include the media-type or dimensions of the resource. Format may be used to determine the software, hardware or other equipment needed to display or operate the resource. Examples of dimensions include size and duration. Recommended best practice is to select a value from a controlled vocabulary (for example, the list of Internet Media Types [MIME] defining computer media formats).
References:	http://dublincore.org/usage/terms/references/#MIME
Type of term:	http://dublincore.org/usage/documents/principles/#element
Status:	http://dublincore.org/usage/documents/process/#recommended
Date issued:	1998-08-06
This version:	http://dublincore.org/usage/terms/dc/#format-004
URI:	http://purl.org/dc/elements/1.1/identifier
Name:	identifier
Label:	Resource Identifier
Definition:	An unambiguous reference to the resource within a given context.
Comment:	Recommended best practice is to identify the resource by means of a string or number conforming to a formal identification system. Example formal identification systems include the Uniform Resource Identifier (URI) (including the Uniform Resource Locator (URL)), the Digital Object Identifier (DOI) and the International Standard Book Number (ISBN).
Type of term:	http://dublincore.org/usage/documents/principles/#element
Status:	http://dublincore.org/usage/documents/process/#recommended
Date issued:	1998-08-06
This version:	http://dublincore.org/usage/terms/dc/#identifier-004
URI:	http://purl.org/dc/elements/1.1/source
Name:	source
Label:	Source
Definition:	A reference to a resource from which the present resource is derived.
Comment:	The present resource may be derived from the Source resource in whole or in part. Recommended best practice is to reference the resource by means of a string or number conforming to a formal identification system.
Type of term:	http://dublincore.org/usage/documents/principles/#element
Status:	http://dublincore.org/usage/documents/process/#recommended
Date issued:	1998-08-06
This version:	http://dublincore.org/usage/terms/dc/#source-004
URI:	http://purl.org/dc/elements/1.1/language
Name:	language
Label:	Language
Definition:	A language of the intellectual content of the resource.
Comment:	Recommended best practice is to use RFC 3066 [RFC3066], which, in conjunction with ISO 639 [ISO639], defines two- and three-letter primary language tags with optional subtags. Examples include "en" or "eng" for English, "akk" for Akkadian, and "en-GB" for English used in the United Kingdom.
References:	http://dublincore.org/usage/terms/references/#RDF3066
References:	http://dublincore.org/usage/terms/references/#ISO639
Type of term:	http://dublincore.org/usage/documents/principles/#element
Status:	http://dublincore.org/usage/documents/process/#recommended
Date issued:	1998-08-06
This version:	http://dublincore.org/usage/terms/dc/#language-005

URI:	http://purl.org/dc/elements/1.1/relation
Name:	relation
Label:	Relation
Definition:	A reference to a related resource.
Comment:	Recommended best practice is to reference the resource by means of a string or number conforming to a formal identification system.
Type of term:	http://dublincore.org/usage/documents/principles/#element
Status:	http://dublincore.org/usage/documents/process/#recommended
Date issued:	1998-08-06
This version:	http://dublincore.org/usage/terms/dc/#relation-004
URI:	http://purl.org/dc/elements/1.1/coverage
Name:	coverage
Label:	Coverage
Definition:	The extent or scope of the content of the resource.
Comment:	Coverage will typically include spatial location (a place name or geographic coordinates), temporal period (a period label, date, or date range) or jurisdiction (such as a named administrative entity). Recommended best practice is to select a value from a controlled vocabulary (for example, the Thesaurus of Geographic Names [TGN]) and that, where appropriate, named places or time periods be used in preference to numeric identifiers such as sets of coordinates or date ranges.
References:	http://dublincore.org/usage/terms/references/#TGN
Type of term:	http://dublincore.org/usage/documents/principles/#element
Status:	http://dublincore.org/usage/documents/process/#recommended
Date issued:	1998-08-06
This version:	http://dublincore.org/usage/terms/dc/#coverage-004
URI:	http://purl.org/dc/elements/1.1/rights
Name:	rights
Label:	Rights Management
Definition:	Information about rights held in and over the resource.
Comment:	Typically, a Rights element will contain a rights management statement for the resource, or reference a service providing such information. Rights information often encompasses Intellectual Property Rights (IPR), Copyright, and various Property Rights. If the Rights element is absent, no assumptions can be made about the status of these and other rights with respect to the resource.
Type of term:	http://dublincore.org/usage/documents/principles/#element
Status:	http://dublincore.org/usage/documents/process/#recommended
Date issued:	1998-08-06
This version:	http://dublincore.org/usage/terms/dc/#rights-004
URI:	http://purl.org/dc/terms/audience
Name:	audience
Label:	Audience
Definition:	A class of entity for whom the resource is intended or useful.
Comment:	A class of entity may be determined by the creator or the publisher or by a third party.
Type of term:	http://dublincore.org/usage/documents/principles/#element
Status:	http://dublincore.org/usage/documents/process/#recommended
Date issued:	2001-05-21
This version:	http://dublincore.org/usage/terms/dc/#audience-002
URI:	http://purl.org/dc/terms/alternative

Name:	alternative
Label:	Alternative
Definition:	Any form of the title used as a substitute or alternative to the formal title of the resource.
Comment:	This qualifier can include Title abbreviations as well as translations.
Type of term:	http://dublincore.org/usage/documents/principles/#element-refinement
Refines:	http://purl.org/dc/elements/1.1/title
Status:	http://dublincore.org/usage/documents/process/#recommended
Date issued:	2000-07-11
This version:	http://dublincore.org/usage/terms/dc/#alternative-002
URI:	http://purl.org/dc/terms/tableOfContents
Name:	tableOfContents
Label:	Table Of Contents
Definition:	A list of subunits of the content of the resource.
Type of term:	http://dublincore.org/usage/documents/principles/#element-refinement
Refines:	http://purl.org/dc/elements/1.1/description
Status:	http://dublincore.org/usage/documents/process/#recommended
Date issued:	2000-07-11
This version:	http://dublincore.org/usage/terms/dc/#tableOfContents-002
URI:	http://purl.org/dc/terms/abstract
Name:	abstract
Label:	Abstract
Definition:	A summary of the content of the resource.
Type of term:	http://dublincore.org/usage/documents/principles/#element-refinement
Refines:	http://purl.org/dc/elements/1.1/description
Status:	http://dublincore.org/usage/documents/process/#recommended
Date issued:	2000-07-11
This version:	http://dublincore.org/usage/terms/dc/#abstract-002
URI:	http://purl.org/dc/terms/created
Name:	created
Label:	Created
Definition:	Date of creation of the resource.
Type of term:	http://dublincore.org/usage/documents/principles/#element-refinement
Refines:	http://purl.org/dc/elements/1.1/date
Status:	http://dublincore.org/usage/documents/process/#recommended
Date issued:	2000-07-11
This version:	http://dublincore.org/usage/terms/dc/#created-002
URI:	http://purl.org/dc/terms/valid
Name:	valid
Label:	Valid
Definition:	Date (often a range) of validity of a resource.
Type of term:	http://dublincore.org/usage/documents/principles/#element-refinement
Refines:	http://purl.org/dc/elements/1.1/date
Status:	http://dublincore.org/usage/documents/process/#recommended
Date issued:	2000-07-11
This version:	http://dublincore.org/usage/terms/dc/#valid-002
URI:	http://purl.org/dc/terms/available
Name:	available
Label:	Available

Definition:	Date (often a range) that the resource will become or did become available.
Type of term:	http://dublincore.org/usage/documents/principles/#element-refinement
Refines:	http://purl.org/dc/elements/1.1/date
Status:	http://dublincore.org/usage/documents/process/#recommended
Date issued:	2000-07-11
This version:	http://dublincore.org/usage/terms/dc/#available-002
URI:	http://purl.org/dc/terms/issued
Name:	issued
Label:	Issued
Definition:	Date of formal issuance (e.g., publication) of the resource.
Type of term:	http://dublincore.org/usage/documents/principles/#element-refinement
Refines:	http://purl.org/dc/elements/1.1/date
Status:	http://dublincore.org/usage/documents/process/#recommended
Date issued:	2000-07-11
This version:	http://dublincore.org/usage/terms/dc/#issued-002
URI:	http://purl.org/dc/terms/modified
Name:	modified
Label:	Modified
Definition:	Date on which the resource was changed.
Type of term:	http://dublincore.org/usage/documents/principles/#element-refinement
Refines:	http://purl.org/dc/elements/1.1/date
Status:	http://dublincore.org/usage/documents/process/#recommended
Date issued:	2000-07-11
This version:	http://dublincore.org/usage/terms/dc/#modified-002
URI:	http://purl.org/dc/terms/extent
Name:	extent
Label:	Extent
Definition:	The size or duration of the resource.
Type of term:	http://dublincore.org/usage/documents/principles/#element-refinement
Refines:	http://purl.org/dc/elements/1.1/format
Status:	http://dublincore.org/usage/documents/process/#recommended
Date issued:	2000-07-11
This version:	http://dublincore.org/usage/terms/dc/#extent-002
URI:	http://purl.org/dc/terms/medium
Name:	medium
Label:	Medium
Definition:	The material or physical carrier of the resource.
Type of term:	http://dublincore.org/usage/documents/principles/#element-refinement
Refines:	http://purl.org/dc/elements/1.1/format
Status:	http://dublincore.org/usage/documents/process/#recommended
Date issued:	2000-07-11
This version:	http://dublincore.org/usage/terms/dc/#medium-002
URI:	http://purl.org/dc/terms/isVersionOf
Name:	isVersionOf
Label:	Is Version Of
Definition:	The described resource is a version, edition, or adaptation of the referenced resource. Changes in version imply substantive changes in content rather than differences in format.
Type of term:	http://dublincore.org/usage/documents/principles/#element-refinement

refinement

Refines: <http://purl.org/dc/elements/1.1/relation>
 Status: <http://dublincore.org/usage/documents/process/#recommended>
 Date issued: 2000-07-11
 This version: <http://dublincore.org/usage/terms/dc/#isVersionOf-002>

URI: <http://purl.org/dc/terms/hasVersion>
 Name: hasVersion
 Label: Has Version
 Definition: The described resource has a version, edition, or adaptation, namely, the referenced resource.

Type of term: <http://dublincore.org/usage/documents/principles/#element-refinement>

refinement

Refines: <http://purl.org/dc/elements/1.1/relation>
 Status: <http://dublincore.org/usage/documents/process/#recommended>
 Date issued: 2000-07-11
 This version: <http://dublincore.org/usage/terms/dc/#hasVersion-002>

URI: <http://purl.org/dc/terms/isReplacedBy>
 Name: isReplacedBy
 Label: Is Replaced By
 Definition: The described resource is supplanted, displaced, or superseded by the referenced resource.

Type of term: <http://dublincore.org/usage/documents/principles/#element-refinement>

refinement

Refines: <http://purl.org/dc/elements/1.1/relation>
 Status: <http://dublincore.org/usage/documents/process/#recommended>
 Date issued: 2000-07-11
 This version: <http://dublincore.org/usage/terms/dc/#isReplacedBy-002>

URI: <http://purl.org/dc/terms/replaces>
 Name: replaces
 Label: Replaces
 Definition: The described resource supplants, displaces, or supersedes the referenced resource.

Type of term: <http://dublincore.org/usage/documents/principles/#element-refinement>

refinement

Refines: <http://purl.org/dc/elements/1.1/relation>
 Status: <http://dublincore.org/usage/documents/process/#recommended>
 Date issued: 2000-07-11
 This version: <http://dublincore.org/usage/terms/dc/#replaces-002>

URI: <http://purl.org/dc/terms/isRequiredBy>
 Name: isRequiredBy
 Label: Is Required By
 Definition: The described resource is required by the referenced resource, either physically or logically.

Type of term: <http://dublincore.org/usage/documents/principles/#element-refinement>

refinement

Refines: <http://purl.org/dc/elements/1.1/relation>
 Status: <http://dublincore.org/usage/documents/process/#recommended>
 Date issued: 2000-07-11
 This version: <http://dublincore.org/usage/terms/dc/#isRequiredBy-002>

URI: <http://purl.org/dc/terms/requires>
 Name: requires
 Label: Requires
 Definition: The described resource requires the referenced resource to support its function, delivery, or coherence of content.

Type of term: <http://dublincore.org/usage/documents/principles/#element-refinement>

refinement

Refines: <http://purl.org/dc/elements/1.1/relation>
 Status: <http://dublincore.org/usage/documents/process/#recommended>
 Date issued: 2000-07-11
 This version: <http://dublincore.org/usage/terms/dc/#requires-002>

URI: <http://purl.org/dc/terms/isPartOf>
 Name: isPartOf
 Label: Is Part Of
 Definition: The described resource is a physical or logical part of the referenced resource.
 Type of term: <http://dublincore.org/usage/documents/principles/#element-refinement>

refinement

Refines: <http://purl.org/dc/elements/1.1/relation>
 Status: <http://dublincore.org/usage/documents/process/#recommended>
 Date issued: 2000-07-11
 This version: <http://dublincore.org/usage/terms/dc/#isPartOf-002>

URI: <http://purl.org/dc/terms/hasPart>
 Name: hasPart
 Label: Has Part
 Definition: The described resource includes the referenced resource either physically or logically.
 Type of term: <http://dublincore.org/usage/documents/principles/#element-refinement>

refinement

Refines: <http://purl.org/dc/elements/1.1/relation>
 Status: <http://dublincore.org/usage/documents/process/#recommended>
 Date issued: 2000-07-11
 This version: <http://dublincore.org/usage/terms/dc/#hasPart-002>

URI: <http://purl.org/dc/terms/isReferencedBy>
 Name: isReferencedBy
 Label: Is Referenced By
 Definition: The described resource is referenced, cited, or otherwise pointed to by the referenced resource.
 Type of term: <http://dublincore.org/usage/documents/principles/#element-refinement>

refinement

Refines: <http://purl.org/dc/elements/1.1/relation>
 Status: <http://dublincore.org/usage/documents/process/#recommended>
 Date issued: 2000-07-11
 This version: <http://dublincore.org/usage/terms/dc/#isReferencedBy-002>

URI: <http://purl.org/dc/terms/references>
 Name: references
 Label: References
 Definition: The described resource references, cites, or otherwise points to the referenced resource.
 Type of term: <http://dublincore.org/usage/documents/principles/#element-refinement>

refinement

Refines: <http://purl.org/dc/elements/1.1/relation>
 Status: <http://dublincore.org/usage/documents/process/#recommended>
 Date issued: 2000-07-11
 This version: <http://dublincore.org/usage/terms/dc/#references-002>

URI: <http://purl.org/dc/terms/isFormatOf>
 Name: isFormatOf
 Label: Is Format Of
 Definition: The described resource is the same intellectual content of the referenced resource, but presented in another format.
 Type of term: <http://dublincore.org/usage/documents/principles/#element-refinement>

refinement

Refines: <http://purl.org/dc/elements/1.1/relation>
 Status: <http://dublincore.org/usage/documents/process/#recommended>
 Date issued: 2000-07-11
 This version: <http://dublincore.org/usage/terms/dc/#isFormatOf-002>

URI: <http://purl.org/dc/terms/hasFormat>
 Name: hasFormat
 Label: Has Format
 Definition: The described resource pre-existed the referenced resource, which is essentially the same intellectual content presented in another format.

Type of term: <http://dublincore.org/usage/documents/principles/#element-refinement>

refinement

Refines: <http://purl.org/dc/elements/1.1/relation>
 Status: <http://dublincore.org/usage/documents/process/#recommended>
 Date issued: 2000-07-11
 This version: <http://dublincore.org/usage/terms/dc/#hasFormat-002>

URI: <http://purl.org/dc/terms/conformsTo>
 Name: conformsTo
 Label: Conforms To
 Definition: A reference to an established standard to which the resource conforms.

Type of term: <http://dublincore.org/usage/documents/principles/#element-refinement>

refinement

Refines: <http://purl.org/dc/elements/1.1/relation>
 Status: <http://dublincore.org/usage/documents/process/#recommended>
 Date issued: 2001-05-21
 This version: <http://dublincore.org/usage/terms/dc/#conformsTo-002>

URI: <http://purl.org/dc/terms/spatial>
 Name: spatial
 Label: Spatial
 Definition: Spatial characteristics of the intellectual content of the resource.

Type of term: <http://dublincore.org/usage/documents/principles/#element-refinement>

refinement

Refines: <http://purl.org/dc/elements/1.1/coverage>
 Status: <http://dublincore.org/usage/documents/process/#recommended>
 Date issued: 2000-07-11
 This version: <http://dublincore.org/usage/terms/dc/#spatial-002>

URI: <http://purl.org/dc/terms/temporal>
 Name: temporal
 Label: Temporal
 Definition: Temporal characteristics of the intellectual content of the resource.

Type of term: <http://dublincore.org/usage/documents/principles/#element-refinement>

refinement

Refines: <http://purl.org/dc/elements/1.1/coverage>
 Status: <http://dublincore.org/usage/documents/process/#recommended>
 Date issued: 2000-07-11
 This version: <http://dublincore.org/usage/terms/dc/#temporal-002>

URI: <http://purl.org/dc/terms/mediator>
 Name: mediator
 Label: Mediator
 Definition: A class of entity that mediates access to the resource and for whom the resource is intended or useful.

Comment:	The audiences for a resource are of two basic classes: (1) an ultimate beneficiary of the resource, and (2) frequently, an entity that mediates access to the resource. The mediator element refinement represents the second of these two classes.
Type of term:	http://dublincore.org/usage/documents/principles/#element-refinement
Refines:	http://purl.org/dc/terms/audience
Status:	http://dublincore.org/usage/documents/process/#recommended

Title: DCMI Encoding Schemes - a current list
Identifier: <http://dublincore.org/usage/terms/dc/current-schemes/>
Date generated: 2002-10-06
Description: This document presents all encoding schemes currently maintained by the DCMI Usage Board. It was generated automatically at the above date from the definitive listing of all term definitions -- past and present -- maintained at <http://dublincore.org/usage/terms/dc/>. Users wishing to consult the full versioning information for a particular term declaration should follow the link labeled "This version:".

URI: <http://purl.org/dc/terms/LCSH>
Name: LCSH
Label: LCSH
Definition: Library of Congress Subject Headings
Type of term: <http://dublincore.org/usage/documents/principles/#encoding-scheme>
Qualifies: <http://purl.org/dc/elements/1.1/subject>
Status: <http://dublincore.org/usage/documents/process/#registered>
Date issued: 2000-07-11
This version: <http://dublincore.org/usage/terms/dc/#LCSH-002>

URI: <http://purl.org/dc/terms/MESH>
Name: MESH
Label: MeSH
Definition: Medical Subject Headings
See: <http://www.nlm.nih.gov/mesh/meshhome.html>
Type of term: <http://dublincore.org/usage/documents/principles/#encoding-scheme>
Qualifies: <http://purl.org/dc/elements/1.1/subject>
Status: <http://dublincore.org/usage/documents/process/#registered>
Date issued: 2000-07-11
This version: <http://dublincore.org/usage/terms/dc/#MESH-002>

URI: <http://purl.org/dc/terms/DDC>
Name: DDC
Label: DDC
Definition: Dewey Decimal Classification
See: <http://www.oclc.org/dewey/index.htm>
Type of term: <http://dublincore.org/usage/documents/principles/#encoding-scheme>
Qualifies: <http://purl.org/dc/elements/1.1/subject>
Status: <http://dublincore.org/usage/documents/process/#registered>
Date issued: 2000-07-11
This version: <http://dublincore.org/usage/terms/dc/#DDC-002>

URI: <http://purl.org/dc/terms/LCC>
Name: LCC
Label: LCC
Definition: Library of Congress Classification
See: <http://lcweb.loc.gov/catdir/cpsolccco/lcco.html>
Type of term: <http://dublincore.org/usage/documents/principles/#encoding-scheme>
Qualifies: <http://purl.org/dc/elements/1.1/subject>
Status: <http://dublincore.org/usage/documents/process/#registered>
Date issued: 2000-07-11
This version: <http://dublincore.org/usage/terms/dc/#LCC-002>

URI: <http://purl.org/dc/terms/UDC>
Name: UDC
Label: UDC
Definition: Universal Decimal Classification
See: <http://www.udcc.org/>
Type of term: <http://dublincore.org/usage/documents/principles/#encoding-scheme>

Qualifies: <http://purl.org/dc/elements/1.1/subject>
 Status: <http://dublincore.org/usage/documents/process/#registered>
 Date issued: 2000-07-11
 This version: <http://dublincore.org/usage/terms/dc/#UDC-002>

URI: <http://purl.org/dc/terms/DCMIType>
 Name: DCMIType
 Label: DCMI Type Vocabulary
 Definition: A list of types used to categorize the nature or genre of the content of the resource.
 See: <http://dublincore.org/documents/dcmi-type-vocabulary/>
 Type of term: <http://dublincore.org/usage/documents/principles/#encoding-scheme>
 Qualifies: <http://purl.org/dc/elements/1.1/type>
 Status: <http://dublincore.org/usage/documents/process/#registered>
 Date issued: 2000-07-11
 This version: <http://dublincore.org/usage/terms/dc/#DCMIType-002>

URI: <http://purl.org/dc/terms/IMT>
 Name: IMT
 Label: IMT
 Definition: The Internet media type of the resource.
 See: [http://www.isi.edu/in-notes/iana/assignments/media-types/media-](http://www.isi.edu/in-notes/iana/assignments/media-types/media-types)

types

Type of term: <http://dublincore.org/usage/documents/principles/#encoding-scheme>
 Qualifies: <http://purl.org/dc/elements/1.1/format>
 Status: <http://dublincore.org/usage/documents/process/#registered>
 Date issued: 2000-07-11
 This version: <http://dublincore.org/usage/terms/dc/#IMT-002>

URI: <http://purl.org/dc/terms/ISO639-2>
 Name: ISO639-2
 Label: ISO 639-2
 Definition: ISO 639-2: Codes for the representation of names of languages.
 See: <http://lcweb.loc.gov/standards/iso639-2/langhome.html>
 Type of term: <http://dublincore.org/usage/documents/principles/#encoding-scheme>
 Qualifies: <http://purl.org/dc/elements/1.1/language>
 Status: <http://dublincore.org/usage/documents/process/#registered>
 Date issued: 2000-07-11
 This version: <http://dublincore.org/usage/terms/dc/#ISO639-2-002>

URI: <http://purl.org/dc/terms/RFC1766>
 Name: RFC1766
 Label: RFC 1766
 Definition: Internet RFC 1766 'Tags for the identification of Language' specifies a two letter code taken from ISO 639, followed optionally by a two letter country code taken from ISO 3166.
 See: <http://www.ietf.org/rfc/rfc1766.txt>
 Type of term: <http://dublincore.org/usage/documents/principles/#encoding-scheme>
 Qualifies: <http://purl.org/dc/elements/1.1/language>
 Status: <http://dublincore.org/usage/documents/process/#registered>
 Date issued: 2000-07-11
 This version: <http://dublincore.org/usage/terms/dc/#RFC1766-002>

URI: <http://purl.org/dc/terms/URI>
 Name: URI
 Label: URI
 Definition: A URI Uniform Resource Identifier
 See: <http://www.ietf.org/rfc/rfc2396.txt>
 Type of term: <http://dublincore.org/usage/documents/principles/#encoding-scheme>
 Qualifies: <http://purl.org/dc/elements/1.1/identifier>

Qualifies: <http://purl.org/dc/elements/1.1/source>
 Qualifies: <http://purl.org/dc/elements/1.1/relation>
 Status: <http://dublincore.org/usage/documents/process/#registered>
 Date issued: 2000-07-11
 This version: <http://dublincore.org/usage/terms/dc/#URI-002>

URI: <http://purl.org/dc/terms/Point>
 Name: Point
 Label: DCMI Point
 Definition: The DCMI Point identifies a point in space using its geographic coordinates.
 See: <http://dublincore.org/documents/dcmi-point/>
 Type of term: <http://dublincore.org/usage/documents/principles/#encoding-scheme>
 Qualifies: <http://purl.org/dc/terms/spatial>
 Status: <http://dublincore.org/usage/documents/process/#registered>
 Date issued: 2000-07-11
 This version: <http://dublincore.org/usage/terms/dc/#Point-002>

URI: <http://purl.org/dc/terms/ISO3166>
 Name: ISO3166
 Label: ISO 3166
 Definition: ISO 3166 Codes for the representation of names of countries
 See: <http://www.din.de/gremien/nas/nabd/iso3166ma/codlstp1/index.html>
 Type of term: <http://dublincore.org/usage/documents/principles/#encoding-scheme>
 Qualifies: <http://purl.org/dc/terms/spatial>
 Status: <http://dublincore.org/usage/documents/process/#registered>
 Date issued: 2000-07-11
 This version: <http://dublincore.org/usage/terms/dc/#ISO3166-002>

URI: <http://purl.org/dc/terms/Box>
 Name: Box
 Label: DCMI Box
 Definition: The DCMI Box identifies a region of space using its geographic limits.
 See: <http://dublincore.org/documents/dcmi-box/>
 Type of term: <http://dublincore.org/usage/documents/principles/#encoding-scheme>
 Qualifies: <http://purl.org/dc/terms/spatial>
 Status: <http://dublincore.org/usage/documents/process/#registered>
 Date issued: 2000-07-11
 This version: <http://dublincore.org/usage/terms/dc/#Box-002>

URI: <http://purl.org/dc/terms/TGN>
 Name: TGN
 Label: TGN
 Definition: The Getty Thesaurus of Geographic Names
 See: <http://www.getty.edu/research/tools/vocabulary/tgn/index.html>
 Type of term: <http://dublincore.org/usage/documents/principles/#encoding-scheme>
 Qualifies: <http://purl.org/dc/terms/spatial>
 Status: <http://dublincore.org/usage/documents/process/#registered>
 Date issued: 2000-07-11
 This version: <http://dublincore.org/usage/terms/dc/#TGN-002>

URI: <http://purl.org/dc/terms/Period>
 Name: Period
 Label: DCMI Period
 Definition: A specification of the limits of a time interval.
 See: <http://dublincore.org/documents/dcmi-period/>
 Type of term: <http://dublincore.org/usage/documents/principles/#encoding-scheme>
 Qualifies: <http://purl.org/dc/elements/1.1/date>
 Qualifies: <http://purl.org/dc/terms/temporal>

Status: <http://dublincore.org/usage/documents/process/#registered>
Date issued: 2000-07-11
This version: <http://dublincore.org/usage/terms/dc/#Period-002>

URI: <http://purl.org/dc/terms/W3CDTF>
Name: W3CDTF
Label: W3C-DTF
Definition: W3C Encoding rules for dates and times - a profile based on ISO 8601
See: <http://www.w3.org/TR/NOTE-datetime>
Type of term: <http://dublincore.org/usage/documents/principles/#encoding-scheme>
Qualifies: <http://purl.org/dc/elements/1.1/date>
Qualifies: <http://purl.org/dc/terms/temporal>
Status: <http://dublincore.org/usage/documents/process/#registered>
Date issued: 2000-07-11
This version: <http://dublincore.org/usage/terms/dc/#W3CDTF-002>

URI: <http://purl.org/dc/terms/RFC3066>
Name: RFC3066
Label: RFC 3066
Definition: Internet RFC 3066 'Tags for the Identification of Languages' specifies a primary subtag which is a two-letter code taken from ISO 639 part 1 or a three-letter code taken from ISO 639 part 2, followed optionally by a two-letter country code taken from ISO 3166. When a language in ISO 639 has both a two-letter and three-letter code, use the two-letter code; when it has only a three-letter code, use the three-letter code. This RFC replaces RFC 1766.
References: <http://dublincore.org/usage/terms/references/#RFC3066>
Type of term: <http://dublincore.org/usage/documents/principles/#encoding-scheme>
Qualifies: <http://purl.org/dc/elements/1.1/language>
Status: <http://dublincore.org/usage/documents/process/#registered>
Date issued: 2002-07-13
This version: <http://dublincore.org/usage/terms/dc/#RFC3066-001>

Title: DCMI Elements and Qualifiers
 Creator: [DCMI Usage Board](#)
 Identifier: <http://dublincore.org/usage/terms/dc/>
 Replaces: <http://dublincore.org/documents/dcmes-qualifiers/>
 Replaces: <http://dublincore.org/documents/dces/>
 Document status: After a final review by the Usage Board, this draft document will replace all other documents as the definitive expression of DCMI element and qualifier definitions.
 Date modified: 2002-10-04
 Description: This document is a consolidated, historically complete, and updated representation of all Elements, Element Refinements, and Encoding Schemes in DCMI-maintained namespaces.

URI: <http://purl.org/dc/elements/1.1/title>
 Namespace: <http://purl.org/dc/elements/1.1/>
 Name: title
 Label: Title
 Definition: A name given to the resource.
 Comment: Typically, a Title will be a name by which the resource is formally known.
 Type of term: <http://dublincore.org/usage/documents/principles/#element>
 Status: <http://dublincore.org/usage/documents/process/#recommended>

URI: <http://purl.org/dc/elements/1.1/language>

Namespace: <http://purl.org/dc/elements/1.1/>

Name: Language

Label: Language

Definition: A language of the intellectual content of the resource.

Comment: Recommended best practice is to use RFC 3066 [RFC3066], which, in conjunction with ISO 639 [ISO639], defines two- and three-letter primary language tags with optional

subtags. Examples include "en" or "eng" for English, "akk" for Akkadian, and "en-GB" for English used in the United Kingdom.

 Name: Language
 Label: Language
 Definition: A language of the intellectual content of the resource.
 Comment: Recommended best practice for the values of the Language element is defined by RFC 1766 [RFC1766] which includes a two-letter Language Code (taken from the ISO 639 standard [ISO639]), followed optionally, by a two-letter Country Code (taken from the ISO 3166 standard [ISO3166]). For example, 'en' for English, 'fr' for French, or 'en-uk' for English used in the United Kingdom.

URI: <http://purl.org/dc/elements/1.1/coverage>
 Namespace: <http://purl.org/dc/elements/1.1/>
 Name: coverage
 Label: Coverage
 Definition: The extent or scope of the content of the resource.
 Comment: Coverage will typically include spatial location (a place name or geographic coordinates), temporal period (a period label, date, or date range) or jurisdiction (such as a named administrative entity).
 Recommended best practice is to select a value from a controlled vocabulary (for example, the Thesaurus of Geographic Names [TGN]) and that, where appropriate, named places or time periods be used in preference to numeric identifiers such as sets of coordinates or date ranges.

URI: <http://purl.org/dc/elements/1.0/coverage>
 Namespace: <http://purl.org/dc/elements/1.0/>
 Name: Coverage
 Label: Coverage
 Definition: The spatial and/or temporal characteristics of the intellectual content of the resource. Spatial coverage refers to a physical region (e.g., celestial sector) using place names or coordinates (e.g., longitude and latitude). Temporal coverage refers to what the resource is about rather than when it was created or made available (the latter belonging in the Date element). Temporal coverage is typically specified using named time periods (e.g., Neolithic) or the same date/time format [W3CDTF] as recommended for the Date element.

URI: <http://purl.org/dc/terms/RFC3066>
 Namespace: <http://purl.org/dc/terms/>
 Name: RFC3066
 Label: RFC 3066
 Definition: Internet RFC 3066 'Tags for the Identification of Languages' specifies a primary subtag which is a two-letter code taken from ISO 639 part 1 or a three-letter code taken from ISO 639 part 2, followed optionally by a two-letter country code taken from ISO 3166. When a language in ISO 639 has both a two-letter and three-letter code, use the two-letter code; when it has only a three-letter code, use the three-letter code. This RFC replaces RFC 1766.

Title:	DCMI Type Vocabulary
Creator:	DCMI Usage Board
Identifier:	http://dublincore.org/usage/terms/dcmitype/
Replaces:	http://dublincore.org/documents/dcmi-type-vocabulary/
Replaces:	http://dublincore.org/documents/2000/07/11/dcmi-type-vocabulary/
Date modified:	2002-07-13
Document status:	After a final review by the Usage Board, this draft document will replace all other documents as the definitive expression of the DCMI Type Vocabulary. Its status will be that of a DCMI Recommendation.
Description:	The DCMI Type Vocabulary provides a general, cross-domain list of approved terms that may be used as values for the Resource Type element to identify the genre of a resource.
URI:	http://purl.org/dc/dcmitype/Collection
Namespace:	http://purl.org/dc/dcmitype/
Name:	Collection
Label:	Collection
Definition:	A collection is an aggregation of items. The term collection means that the resource is described as a group; its parts may be separately described and navigated.
Type of term:	http://dublincore.org/usage/documents/principles/#controlled-vocabulary-term
Status:	http://dublincore.org/usage/documents/process/#recommended
Date issued:	2000-07-11
Decision:	http://dublincore.org/usage/decisions/#Decision-2000-02
This version:	http://dublincore.org/usage/terms/dcmitype/#Collection-001
URI:	http://purl.org/dc/dcmitype/Dataset
Namespace:	http://purl.org/dc/dcmitype/
Name:	Dataset
Label:	Dataset
Definition:	A dataset is information encoded in a defined structure (for example, lists, tables, and databases), intended to be useful for direct machine processing.
Type of term:	http://dublincore.org/usage/documents/principles/#controlled-vocabulary-term
Status:	http://dublincore.org/usage/documents/process/#recommended
Date issued:	2000-07-11
Decision:	http://dublincore.org/usage/decisions/#Decision-2000-02
This version:	http://dublincore.org/usage/terms/dcmitype/#Dataset-001
URI:	http://purl.org/dc/dcmitype/Event
Namespace:	http://purl.org/dc/dcmitype/
Name:	Event
Label:	Event
Definition:	An event is a non-persistent, time-based occurrence. Metadata for an event provides descriptive information that is the basis for discovery of the purpose, location, duration, responsible agents, and links to related events and resources. The resource of type event may not be retrievable if the described instantiation has expired or is yet to occur. Examples - exhibition, web-cast, conference, workshop, open-day, performance, battle, trial, wedding, tea-party, conflagration.
Type of term:	http://dublincore.org/usage/documents/principles/#controlled-vocabulary-term

Status: <http://dublincore.org/usage/documents/process/#recommended>
 Date issued: 2000-07-11
 Decision: <http://dublincore.org/usage/decisions/#Decision-2000-02>
 This version: <http://dublincore.org/usage/terms/dcmitype/#Event-001>

URI: <http://purl.org/dc/dcmitype/Image>

Namespace: <http://purl.org/dc/dcmitype/>

Name: Image

Label: Image

Definition: An image is a primarily symbolic visual representation other than text. For example - images and photographs of physical objects, paintings, prints, drawings, other images and graphics, animations and moving pictures, film, diagrams, maps, musical notation. Note that image may include both electronic and physical representations.

Type of term: <http://dublincore.org/usage/documents/principles/#controlled-vocabulary-term>

Status: <http://dublincore.org/usage/documents/process/#recommended>

Date issued: 2000-07-11

Decision: <http://dublincore.org/usage/decisions/#Decision-2000-02>

This version: <http://dublincore.org/usage/terms/dcmitype/#Image-001>

URI: <http://purl.org/dc/dcmitype/InteractiveResource>

Namespace: <http://purl.org/dc/dcmitype/>

Name: InteractiveResource

Label: Interactive Resource

Definition: An interactive resource is a resource which requires interaction from the user to be understood, executed, or experienced. For example - forms on web pages, applets, multimedia learning objects, chat services, virtual reality.

Type of term: <http://dublincore.org/usage/documents/principles/#controlled-vocabulary-term>

Status: <http://dublincore.org/usage/documents/process/#recommended>

Date issued: 2000-07-11

Decision: <http://dublincore.org/usage/decisions/#Decision-2000-02>

This version: <http://dublincore.org/usage/terms/dcmitype/#InteractiveResource-001>

URI: <http://purl.org/dc/dcmitype/Service>

Namespace: <http://purl.org/dc/dcmitype/>

Name: Service

Label: Service

Definition: A service is a system that provides one or more functions of value to the end-user. Examples include: a photocopying service, a banking service, an authentication service, interlibrary loans, a Z39.50 or Web server.

Type of term: <http://dublincore.org/usage/documents/principles/#controlled-vocabulary-term>

Status: <http://dublincore.org/usage/documents/process/#recommended>

Date issued: 2000-07-11

Decision: <http://dublincore.org/usage/decisions/#Decision-2000-02>

This version: <http://dublincore.org/usage/terms/dcmitype/#Service-001>

URI: <http://purl.org/dc/dcmitype/Software>

Namespace: <http://purl.org/dc/dcmitype/>

Name: Software
 Label: Software
 Definition: Software is a computer program in source or compiled form which may be available for installation non-transiently on another machine. For software which exists only to create an interactive environment, use interactive instead.

Type of term: <http://dublincore.org/usage/documents/principles/#controlled-vocabulary-term>

Status: <http://dublincore.org/usage/documents/process/#recommended>
 Date issued: 2000-07-11
 Decision: <http://dublincore.org/usage/decisions/#Decision-2000-02>
 This version: <http://dublincore.org/usage/terms/dcmitype/#Software-001>

URI: <http://purl.org/dc/dcmitype/Sound>

Namespace: <http://purl.org/dc/dcmitype/>

Name: Sound

Label: Sound

Definition: A sound is a resource whose content is primarily intended to be rendered as audio. For example - a music playback file format, an audio compact disc, and recorded speech or sounds.

Type of term: <http://dublincore.org/usage/documents/principles/#controlled-vocabulary-term>

Status: <http://dublincore.org/usage/documents/process/#recommended>
 Date issued: 2000-07-11
 Decision: <http://dublincore.org/usage/decisions/#Decision-2000-02>
 This version: <http://dublincore.org/usage/terms/dcmitype/#Sound-001>

URI: <http://purl.org/dc/dcmitype/Text>

Namespace: <http://purl.org/dc/dcmitype/>

Name: Text

Label: Text

Definition: A text is a resource whose content is primarily words for reading. For example - books, letters, dissertations, poems, newspapers, articles, archives of mailing lists. Note that facsimiles or images of texts are still of the genre text.

Type of term: <http://dublincore.org/usage/documents/principles/#controlled-vocabulary-term>

Status: <http://dublincore.org/usage/documents/process/#recommended>
 Date issued: 2000-07-11
 Decision: <http://dublincore.org/usage/decisions/#Decision-2000-02>
 This version: <http://dublincore.org/usage/terms/dcmitype/#Text-001>

URI: <http://purl.org/dc/dcmitype/PhysicalObject>

Namespace: <http://purl.org/dc/dcmitype/>

Name: PhysicalObject

Label: Physical Object

Definition: An inanimate, three-dimensional object or substance. For example -- a computer, the great pyramid, a sculpture. Note that digital representations of, or surrogates for, these things should use Image, Text or one of the other types.

Type of term: <http://dublincore.org/usage/documents/principles/#controlled-vocabulary-term>

Status: <http://dublincore.org/usage/documents/process/#recommended>
 Date issued: 2002-07-13

Decision: <http://dublincore.org/usage/decisions/#Decision-2002-02>
This version: <http://dublincore.org/usage/terms/dcmitype/#PhysicalObject-001>

Title: DCMI Metadata Terms
 Creator: [DCMI Usage Board](#)
 Identifier: <http://dublincore.org/usage/terms/>
 Date modified: 2002-10-06

Overview

See <http://dublincore.org/usage/> for an annotated roadmap to documentation for metadata terms maintained by the DCMI Usage Board:

<http://dublincore.org/usage/terms/dc/>
<http://dublincore.org/usage/terms/dcmitype/>

The policies and processes governing the maintenance of these terms are described in a DCMI Namespace Policy [1], DCMI Grammatical Principles [2], and DCMI Usage Board Administrative Processes [3].

Attributes of DCMI term declarations

- * URI: The unique identifier of a term (see [1]).
- * Namespace: The namespace within which the term is defined (see [1]).
- * Name: The unique token assigned to the term.
- * Label: The human-readable label assigned to the term.
- * Definition: A statement that represents the concept and essential nature of the term.
- Comment: Additional information about the term or its application. Comments are not part of the declarations of terms in the namespace <http://purl.org/dc/elements/1.0/>.
- See: A link to authoritative documentation.
- References: A link to a complete citation of a resource referenced in the Definition or Comment.
- * Type of term: Currently one of four types of term:
<http://dublincore.org/usage/documents/principles/#element-refinement>
<http://dublincore.org/usage/documents/principles/#element-scheme>
<http://dublincore.org/usage/documents/principles/#encoding-vocabulary-term>
<http://dublincore.org/usage/documents/principles/#controlled-vocabulary-term>
- Refines: For Element Refinements only, the URI of a term refined.
- Qualifies: For Encoding Schemes only, the URI of a term qualified.
- Status: Status assigned to term by Usage Board, currently one of the following:
<http://dublincore.org/usage/documents/process/#conforming>
<http://dublincore.org/usage/documents/process/#recommended>
<http://dublincore.org/usage/documents/process/#registered>.
 Several superseded declarations of legacy terms record the obsolete status "Domain-Specific".
- * Date issued: Date on which a term was first declared.
- Date modified: Date on which a term declaration was subsequently modified.
- * Decision: A numbered Usage Board decision (see [4]). By definition, each successive historical version of a term declaration is associated with exactly one

- numbered decision. (Each decision, in turn, is associated with supporting documentation for the decision.)
- * This version: An identifier for this historical version of a term declaration (i.e., the one you are currently looking at).
- Replaces: An identifier for the historical version of a term declaration superseded by this historical version.
- Is Replaced By: An identifier for the historical version of a term declaration by which this historical version is superseded.

Note: Attributes marked above with an asterisk are obligatory.
